2023–2024 / PARQUET MAGAZINE / WOODEN FLOORS

Beautiful, functional and naturally sustainable.
Swedish craftsmanship since 1886.

Our wood floors are created by nature. Every shift in colour, every mark and grain has its own story. Our job is to gently transform them into a natural part of your interior. Into floors you will love to live with. A floor to use and enjoy for generations.

Welcome to Tarkett.

A vast majority of our wood raw material comes from well-maintained forests in Sweden and Finland. Many of our wood floors are still manufactured in Sweden.

Explaining Tarkett Human-Conscious Design®

Our history

130 years of genuine craftsmanship.
A legacy to be proud of.

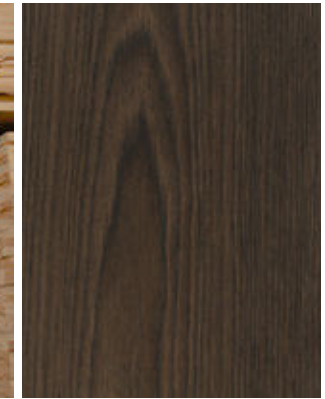

Shaped by nature

Our wood floors are made from up
to 97% real wood, one of the worlds
most renewable raw materials.

Swedish tradition

Many of our wood floors are still
produced in Sweden.

Sustainable design

Our floors age naturally and are
made to be re-sanded, re-laquered or
re-oiled.

Swedish craftsmanship since 1886

We come from one of the world's most well-forested countries.
Maybe that's why we feel so strongly about wood.

That the story of Tarkett should have its roots in a land rich in forests is not so strange. Our passion for wood and the skills of transforming it to meet basic human needs have been passed from generation to generation. At Tarkett we know that the dense Nordic forests hold both our history and our future.

Since 1886 we have produced beautiful, functional and sustainable wood floors. What started as a small carpentry shop in Malmö, Sweden, is today a major flooring group with manufacturing sites spread around the world. Production has been transformed by modern means, but the heritage from the 19th century remains – in the craftsmanship, knowledge and care for the raw material. We still work to enhance the unique character of every plank. And we are proud to continue this tradition in a sustainable way 130 years later.

Time for wooden floors!

Pella Hedeby is a Swedish interior decorator and often starts with the floor when she decorates. Tarkett met her for a chat about the future of floors and how to get it right.

Meet Pella!
Name: Pella Hedeby
Age: 44 years
Lives: Södertälje, 20 mins south of Stockholm
Profession: Interior decorator and stylist

"With a beautiful floor you don't need much else."

– I often start with the floor, since it's a constant with great impact on how the room will feel over time. Wall colour, furniture and textiles are easier to change. The floor is one of the most important elements of your home. The foundation, really, for everything else.

In her interiors, Pella often returns to natural materials and colours from nature. Wood, stone and linen are returning elements, but her designer influences come from all over the world, with Japanese handicraft and Belgian architecture as her personal favourites. Her colour scheme always feels natural, with pale pastels and deep, earthy tones side by side.

But how to find a personal look, when one's not a trained decorator?

– Make moodboards! Use Pinterest or magazines, cut out what you like and see what seems to be your favourite things, find a common denominator. And if you end up in a panic, with a moodboard that looks like a million different things, ask a professional! Talk to someone who does this for a living, invest a little time in it. There's much to choose from and no shame in not knowing what to pick. If feeling lost, my top tip is to mellow everything down a bit, choose something natural that doesn't pop too much. Then you know you won't get tired of it.

And once you've decided on a new floor, what's important to think about?

– Firstly, think longevity. If you're buying a new floor, make a sustainable choice with good quality and ageless style. A wood floor lasts practically forever, and can be re-sanded and cherished again after years of use, so stick with something you can live with – and love. Don't be afraid of how the colour will age! Ask yourself the following questions:

Style wise, what will work for me?

Is it a calm single strip plank, a classic herringbone or maybe a 3-strip parquet where the colour makes the difference? What does my home look like? Which shade is best suited to my needs? Light floors create an airy feeling, natural shades bring warmth and dark floors add character and elegance.

These last years we've seen a return to natural materials and genuine craftsmanship. Many today choose sustainable solutions with a care for nature and the environment.

What types of floors do you think we'll see in the future?

– I believe a genuine and natural simplicity will win over time. In a world where we're constantly bombarded by impressions, the home needs to be a place where we can rewind and find time for peace and reflection. A wooden floor creates a soft backdrop for the rest of your home. Simply and elegantly, it creates an atmosphere of natural calm. I believe we'll see more of wide planks, for a quiet and understated base, but also timeless classics such as herringbone. And 2- and 3-strip parquets in lovely shades can also really make an impression. One of my current favourites is Tarkett Shade Oak Soft Beige in 3-strip. Soft and lively at once, it gives your room a calm and relaxing feel.

– A wood floor is both genuine and timeless. And with a beautiful floor you don't need to add much to create a beautiful home.

Pro tips from Pella

1. Choose with care and see your floor as a lifelong investment.
2. Hard to find your look?
Ask a pro!
3. Playing it safe is smart. Choose something you won't get tired of.

8 X COLLECTIONS

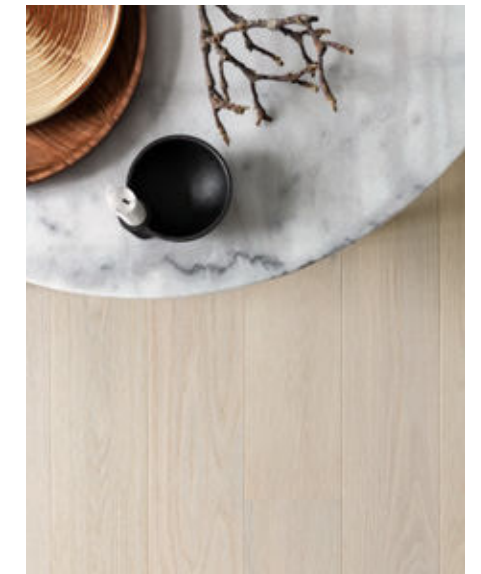

ENDLESS POSSIBILITIES

Clean lines, simple elegance or bold expressions – in our eight collections there's a wooden floor for every home and room. Be inspired by classic Nordic design or innovative special effects, let the light in with blonde wood or create a warm and cosy feeling with dark parquet. Flip through, make notes and bookmark your favourites. And if feeling undecided, let us know! We have 130 years of experience and would love to share our knowledge with you.

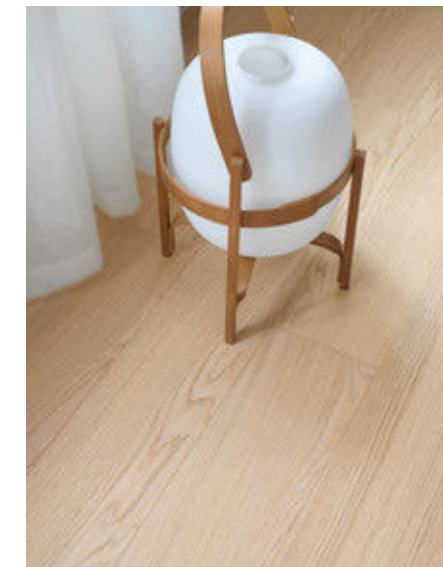

NOBLE is a beautiful reinterpretation of the classic parquet floor, framed in a modern, modular form.

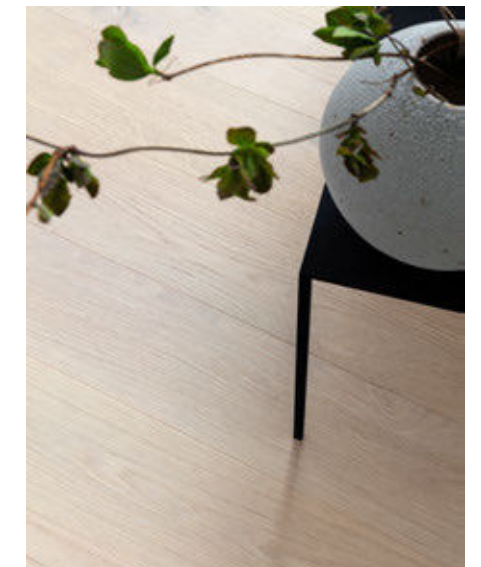

SHADE creates a contemporary and Scandinavian feel, with natural differences and colour nuances straight from nature.

HERITAGE features genuinely rustic oak with strong character and details shaped by nature.

VIVA are thin yet durable wood veneer floors – easy to handle and a perfect solution for both playful children and the first flat.

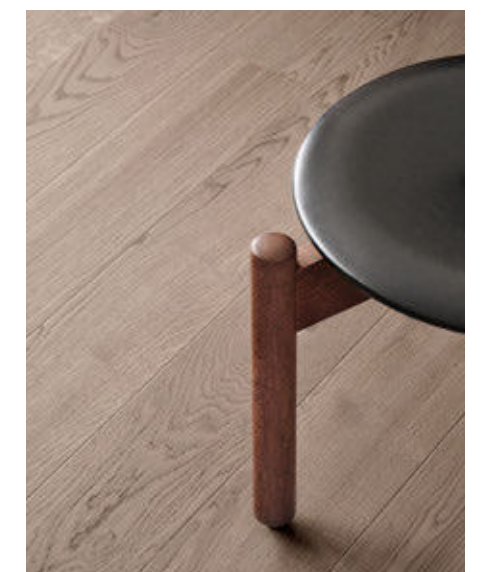

PRESTIGE offers a soft, natural look, as if the planks had been left to be weathered by sun, sand and wind.

PURE is a simple and beautiful floor in 3-strip or plank, celebrating the authentic variations of nature's own design.

SEGNO proves that classic design can also become the most innovative when used in the right way.

GRACE is a soft and elegant oak floor with a true wooden feel, sheer, beautiful and genuinely sustainable.

News 2023

grace

Natural, Elegant. Sheer and beautiful. A timeless background to all the living taking place in your home.

Easy to enjoy, easy to care for. Forgiving towards extravagant celebrations and everyday adventures alike.

1

Super matt and silky soft, an oak floor for bare feet and open spaces. Brushed to enhance the unique patterns in the wood.

2

Responsibly produced and certified in accordance with Nordic Swan Ecolabel and PEFC. Sustainable. For real.

3

Easy to clean and to maintain. Resistant to everyday tear and wear. Ages naturally and stays beautiful.

GRACE / Oak Grey Chiffon Plank / 7876125
Sleek and cosy at the same time, when dark stained oak meets super matt Grace in grey. Contemporary yet classic, with wood through and through, and contrasts that complement each other.

GRACE / Oak Rustic Plank XT / 7877067
Add a soft, natural warmth with a honey coloured floor. A nice counterbalance to the cooler shades of the walls and a beautiful and sustainable way to tie the interior together.

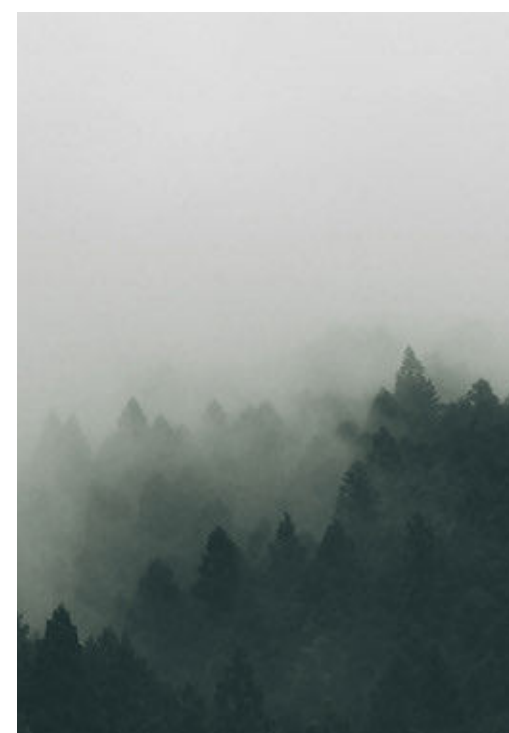

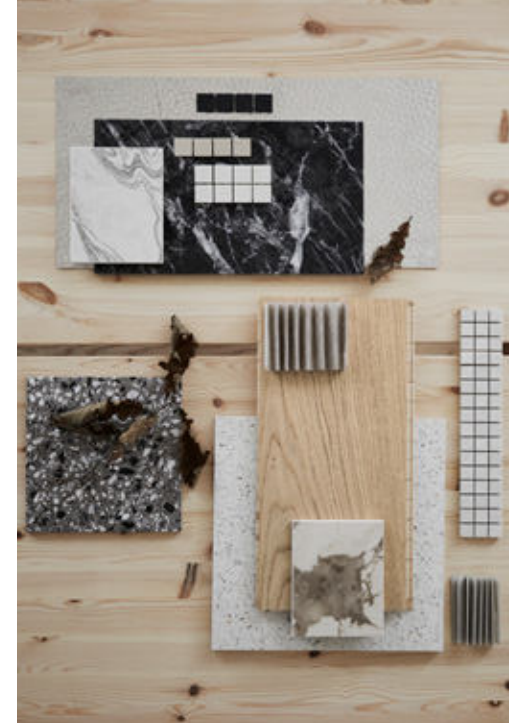

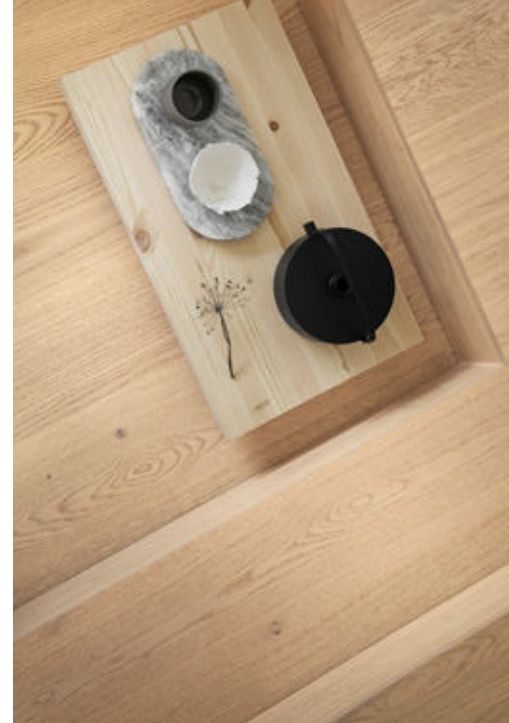

GRACE / Oak Era / 7806020
Silky smooth and easy to keep clean, Grace is a floor for quiet dinners and big celebrations alike. Soft and durable at once, a joy to walk on and easy to care for.

GRACE / Oak Soft Skin TreS / 7870074
Soft pastels, natural materials and a floor made for bare feet. Stone, wood and leather in a soft and warm combination, speaking to all senses.

SHADE / Oak Cream White Plank XT / 7877049
Nordic blonde with a hint of Asian minimalism. A discreet and harmonious background to bedrooms, dining rooms or work areas.

PRESTIGE / Oak Satin White / 7876094
Bright, light and silky smooth. A floor made for bare feet and generous surfaces.

HERITAGE / Oak Lime Stone / 41007002
Rustic planks with strong character and natural details, both timeless and contemporary.

SEGNO / Oak / 41020025
Traditional or innovative – Segno is a genuine parquet floor with endless possibilities.

NOBLE / Oak Scandinavia / 7806008
Easy and elegant. A modern modular look and colours to brighten both office space and working from home.

SHADE / Oak Cream White TreS / 8723925
Warm, cosy and harmonious. A beautiful and durable base for your working space.

PRESTIGE / Oak Satin White / 7876094
Prestige is a contemporary and Scandinavian look with natural differences and colours straight from nature.

SHADE / Oak Soft Beige Plank / 7878023
Play with colours and see how it effects the look of your floor. A warm beige floor can be light and airy, or warm and muted, depending on your wall colour.

SHADE / Oak Italian Brown Plank / 7876112
Warm, elegant and classic, a floor that speaks volumes on larger surfaces and lifts the character of smaller spaces.

NOBLE / Oak Retro / 7806007

The Noble collection consists of modular patterns where the grain varies and natural differences give a unique character to every board. Particularly in Retro, a modern tribute to the parquet floor of old days.

NOBLE / Oak Classic / 7806018
A classic parquet with basket weave is a nice way to enhance the look of a mid-century home. Classic and contemporary at once.

NOBLE / Oak Wasa / 7806010

A dark floor can enhance and accentuate the light and brightness in a home with neutral colours. The contrasts lift each other and create interesting harmonies.

NOBLE / Oak Bronx / 7806017
Hardwax oil enhances the unique variations of the wood in this warm grey Noble floor. A joy for barefoot feet as well as a distinct modern base in your home.

NOBLE / Oak Art Deco / 7806009

Classic parquet with a twist. Intensify the warmth of the wood with a contrasting wall colour, let opposites attract when wood meets textiles and stone.

NOBLE / Oak Soho / 7806012
Make a statement with shapes, colours and patterns, and tie it all together with a warm and light parquet floor.

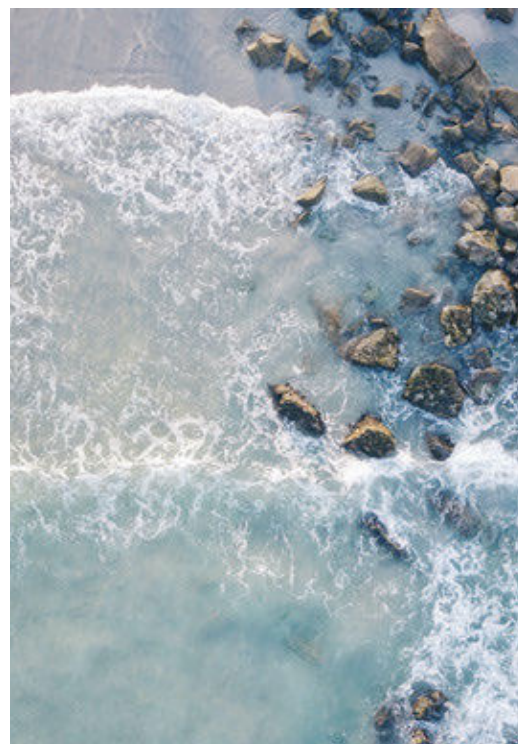

HERITAGE / Oak Lime Stone / 41007002
Genuinely rustic oak with strong character and endless natural variations in patterns and expressions.

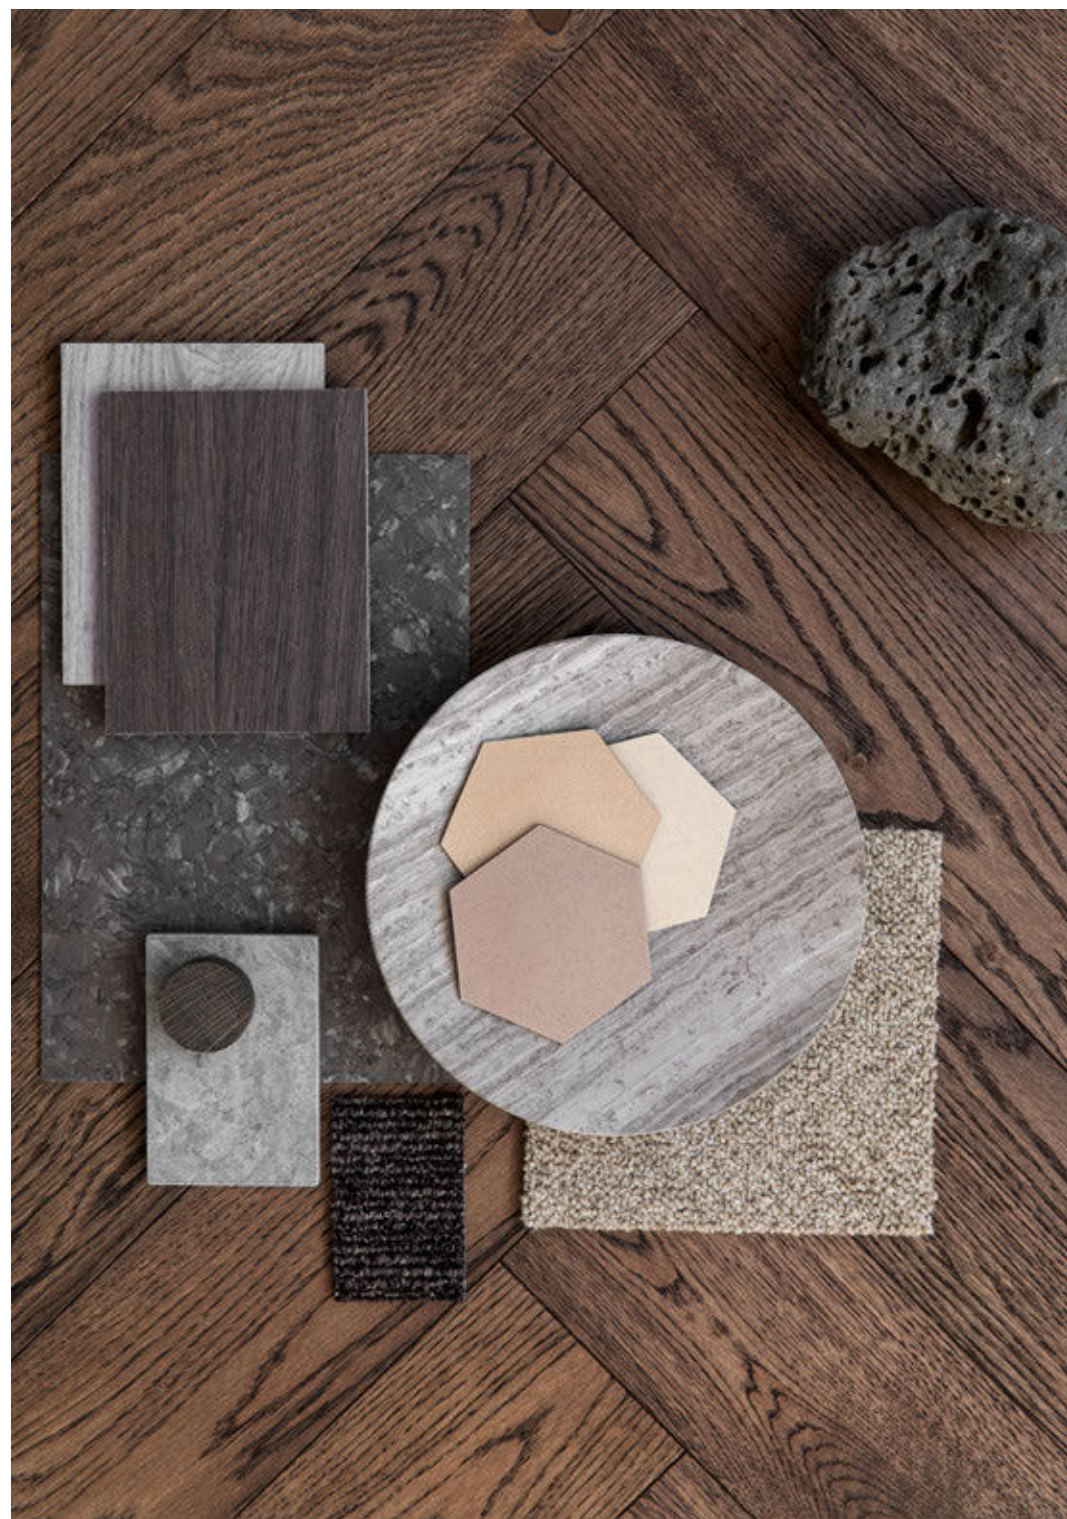

PRESTIGE / Oak White Sand / 7877046
A soft, natural look, as if the planks had been left to be weathered by sun, sand and wind.

PRESTIGE / Ash Seashell / 7967018
Nature is ever present in this silky smooth ash floor with broad planks and beautiful nuances.

SEGNO / Oak Old Brown / 41020029
A timeless herringbone with a matt finish that enhances both classic details and modern elements.

SENO / Oak Blonde / 41020023
 Classic herringbone meets a contemporary, industrial look, adding natural warmth and beauty to a modern design.

SEGNO / Oak / 41020025
 Solid oak with a timeless feel, a floor that easily could be as old as the building itself.
 Classic and durable for home as well as office or showroom.

PURE / Oak Rustic Plank XT / 7879004
A floor with a lively expression where the oak's natural patterns and variations are predominant.

PURE / Oak Nature TreS / 8723924
In the Pure collection we focus on the beauty of classic species such as oak, ash, beech, birch and walnut. A simple floor – if by simple you mean naturally beautiful.

VIVA / Oak White (1-strip) / 7828013

The Viva collection consists of thin yet durable wood veneer floors. Easy to handle and a perfect solution for rooms where you spend a lot of time – such as the beloved kitchen.

VIVA / Oak White (1-strip) / 7828013
Beautiful, durable, easy to install and to care for. A forgiving floor for your first flat, the years with young children – and everything in between.

NOBLE / Oak Art Deco / 7806009
Warm and lovely, strong and inviting. A floor for the kitchen or bedroom, working space or living room.

SEGNO / Oak Blonde / 41020023
Play with contrasts and let a classic herringbone meet the clean lines of a modern kitchen, and warm honey enhance the cool grey.

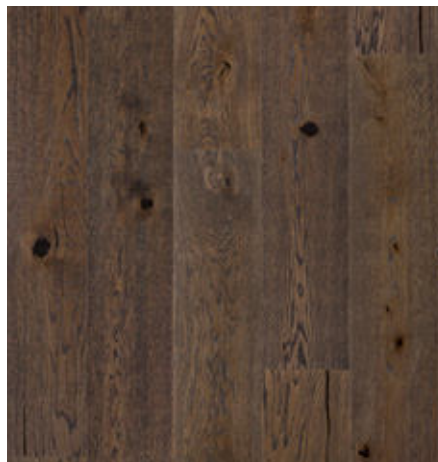

SHADE / Ash Melange TreS / 7969003
With Shade it's easy to create the expression you're looking for, with nearly 40 different nuances to choose from.

Choosing your floor

1. Colours and patterns
2. Wood species
3. Wood character
4. Brushing and bevels
5. Surface protection
6. Installation
7. Care and maintenance

Wood is a living material with endless variations. It's beautiful, functional and naturally sustainable, making our wood floors a timeless addition to any home. But choosing a floor that could last as long as the building housing it takes some consideration. What does a wood floor mean to you? How do you want it to look?

1. Colours and patterns

A new floor can both enhance your current look and create an unexpected contrast.

Lighter wood creates a sense of space and airiness, while darker tones gives your home a feeling of warmth and cosiness. Classic planks give a timeless look, while modern squares and colours create a contemporary and innovative feel. Think about how your parquet will work with your overall design scheme, with wall colours and furniture. Consider the atmosphere you want to create and how much light you have to work with.

Our wood floors are designed by nature. Our job is to gently shape them into a beautiful part of your home.

What feeling are you after? In these pages we'll sort through some of the more important things when choosing your floor. Have a look, make some notes and don't be afraid to ask. Also, Pella Hedeby has some really good ideas on page 6!

A floor for every room

There is a wood floor for every room – here are some of our favourites:

The **living room** is often the largest room in a home, so don't be afraid to let the floor be the centre of attention here. A 1-strip floor looks really good on larger surfaces, such as new and elegant Grace or classic Heritage. If you're looking for a bolder expression, try Noble or Segno.

When choosing your **kitchen** floor, look for a surface protection that is super resistant and easy to clean. A laquered floor is perfect for all rooms with high-traffic areas, kitchens included. Here you might want to consider Shade or Grace.

Your **bedroom** should be a soothing oasis of calm. A brushed floor, such as Prestige or Pure, is naturally beautiful and lovely for bare feet to walk on.

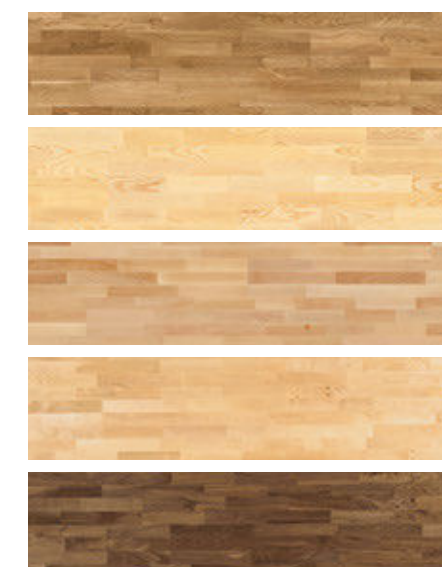

Kids bedrooms are best off with a floor that's equipped to prevent indentations from dropped toys and high-spirited games. Our collection Viva is a hard veneer floor that will survive both sharp Lego and messy pirates.

2. Wood species

Every wood species has its unique character, qualities and features.

The slow growth in the Northern hemisphere lead to strong and stable trees. The material for our middle and bottom layers are therefore spruce and pine predominantly from Swedish and Finnish forests. The raw material for top layers is often European oak. We use the whole log, and the grain and pattern are what form the design, making for beautiful, distinctive floors that exude a natural warmth.

OAK Exceedingly strong, durable and very popular, oak comes in a number of natural patterns and hues. As it matures, its colour changes and becomes more golden.

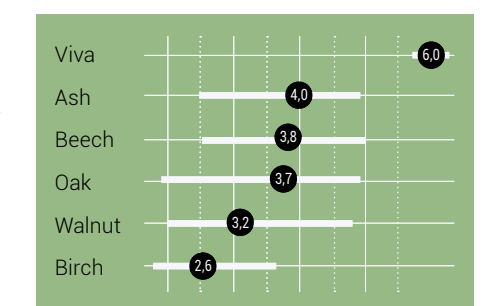

ASH Strong and durable. The contrast between the dark heartwood and the light top layers gives a lively pattern with many nuances. Ash acquires a warm golden tone over time.

BEECH A species that ages with dignity. The beautiful grain and colour creates a floor with much elegance. Beech ranges in colour from red to golden hues.

BIRCH Softer than other wood species, pale and almost shimmering in colour. With time, birch turns darker, warmer and more golden. Not suitable for high-traffic areas.

WALNUT Beautiful grain and a warm, brown colour. Over time walnut becomes a bit lighter, but keeps its warm brown hue – which sometimes becomes almost reddish.

BRINELL HARDNESS SCALE

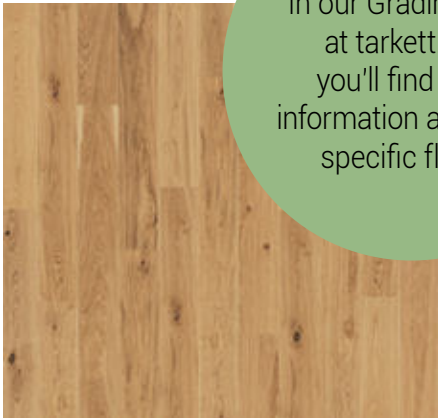

The Brinell test measures the hardness of a wood by pushing a small steel ball against the surface of the wood using a heavy load. Its Brinell number is then determined by the size of the indentation made. The higher the Brinell number, the harder and more resistant the wood. The numbers shown here are averages based on several tests. Viva has a high Brinell number due to its hard HDF core, which absorbs the force of the ball.

3. Wood character

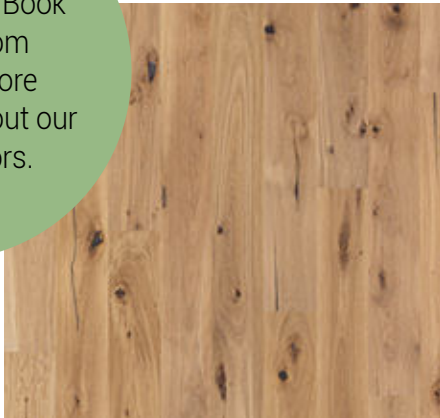

Lively, calm or expressive?
There's a wooden floor for every home and look.

CALM
A quiet look with few knots and less variations in colour and structure, ideal for a minimalistic and contemporary interior.

LIVELY
A larger variation in colour and structure with an increased number of distinct knots, this style brings a sense of warmth and comfort to the home, resulting in a classic, rustic look.

EXPRESSIVE
An appearance full of character, with large knots, cracks, tiny holes and exciting variations in colour and structure. The perfect choice if you're going for a bold industrial or cottage feel.

In our Grading Book at tarkett.com you'll find more information about our specific floors.

4. Brushing and bevels

It's nature's design
– we just enhance what is already there.

BRUSHED
A light finish that brings out the natural wood pattern and the visual effect in the wood.

ANTIQUE BRUSHED
A finish that brings out the details in the wood structure, giving the floor a soft and natural feel.

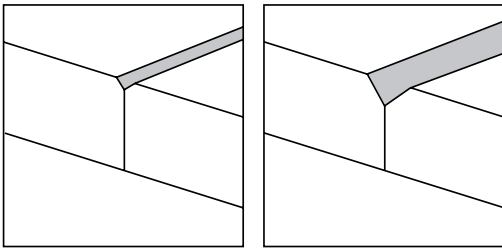

DEEP BRUSHED
A finish going slightly deeper, thus enhancing the rustic appearance.

Surface structure and colour variations can really change the look and feel of a room, so it's important to factor those into your decision. Different parts of the raw material give the floor its unique character, and we have divided them into three categories to help you find the right one.

Colour and character aren't the only elements to influence the look of your wooden floor. Various brushing techniques are a great way of enhancing wood's beautiful natural pattern.

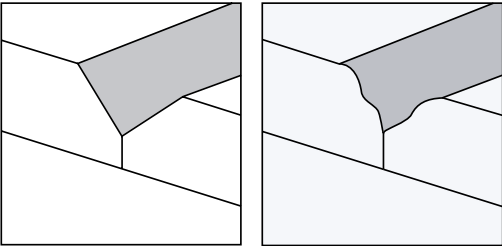

Different bevels

Our collections come with four different kinds of bevels that, depending on how deep or wide it is, will add to your floor's character. Stick with a shallower micro or mini bevel for a smoother finished look or opt for a deeper maxi or handmade bevel for an artisanal vintage feel.

MICROBEVEL

MINIBEVEL

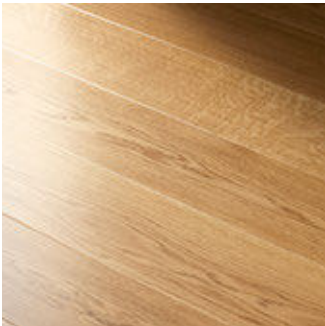

MAXIBEVEL

HANDMADE BEVEL

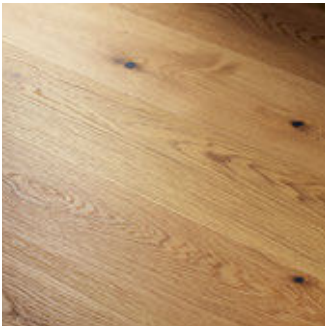

5. Surface protection

It's not the actual wood you are wearing down, but the surface protection.

Tarkett's Proteco consists of four different surface protections with a great resistance towards wear and stains. With a lacquered floor you'll get a strong and hardy surface, whilst keeping the natural wood feel. A hardwax oiled floor demands a little more in terms of maintenance, but lifts the natural properties of the wood.

PROTECO LACQUER
A semi-gloss lacquer that lasts long and add extra durability to your floors. Gives a traditional lacquered look and is the perfect choice for the active family needing a wooden floor that can more or less manage on its own.

PROTECO NATURA
A matt option with high durability and effective protection. Comes in a number of colours that lifts and enhances the wood's natural abilities. Easy to care for, even if the matt surface demands a little more frequent maintenance than Proteco Lacquer.

PROTECO EXTRAMATT
This protection will give you an extra matt, silky surface that imitates the feeling of an oiled or untreated floor, but with the durability of a lacquered floor. Needs minimal maintenance and is long-lasting. A perfect combination of natural appearance, heightened wood feel and effective protection.

PROTECO HARDWAX OIL
Adds a soft and matt surface with a warm, natural feel. Increases the experience of authentic wooden floors and heightens the nuances of the wood. Hardwax oiled floors must be cared for regularly, but well taken care of, will age beautifully and naturally and last a very long time. The perfect choice when the wooden feel is what's most important.

6. Installation

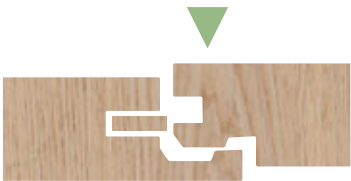

You can install most of our floors yourself – it’s a lot easier than you probably think.

Three systems for easy flooring

Our installation methods are designed to make parquet flooring accessible to everyone, from beginners to expert carpenters. Chances are, you already have all the tools needed.

Experiment!
Open several boxes of the floor you're installing and play around to find the best mix for beautiful transitions and colour variations.

2-LOCK – QUICK AND EASY

Super quick and easy, the 2-lock makes it simpler than ever to lay wooden floors. The secret is a small spring at the end of each floorboard which locks the board to its neighbor when pressed down. Most of our ranges come with this type of installation method.

ULTRALOC

A time effective and glue-free system for our Viva collection. Perfect for beginners thanks to its simple locking system. Furthermore, its 8.5 mm thickness allows you to install it on top of an existing floor without having to change door frames.

GLUE DOWN INSTALLATION

Ideal for creating patterned parquets, as with our Segno range, featuring a tongue and groove system for glue down installation. This requires some carpentry skills to achieve the desired result, so we recommend you get help from a professional.

Underfloor heating

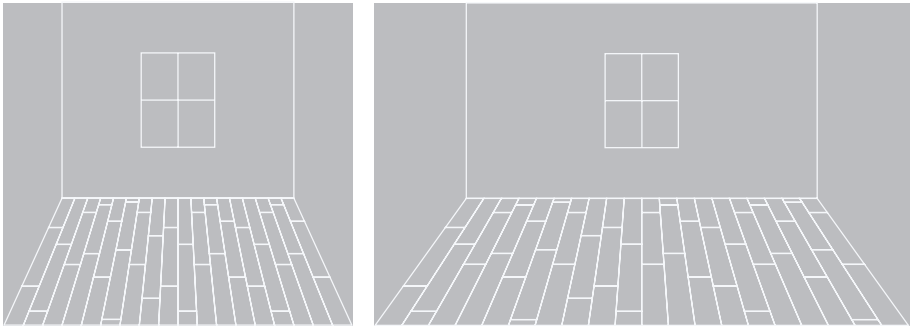

Most of our floors work really well with underfloor heating.

It is, however, essential that the surface temperature never exceeds 27°C and that the chosen system distributes heat equally throughout the entire floor surface. Some wood species are also more prone to movement and therefore are not recommended. To find out more about whether your chosen parquet is suitable for underfloor heating, read our product guide on tarkett.com.

Adapt your laying after the room

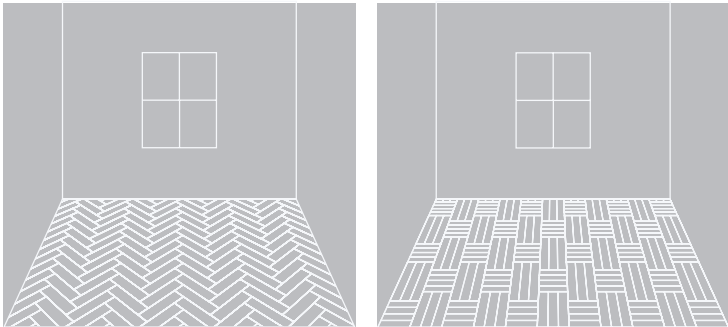

A parquet floor can make a room seem both wider and more narrow. The direction in which you lay your boards will have a big impact on the perception of the room's size and shape.

Decide on a direction for your boards. Lengthways is the most obvious choice, as it elongates the room. Bigger rooms can handle larger, wider planks that emphasize the space.

Choosing your pattern

Classic patterns such as herringbone will add a timeless feeling of elegance and heritage. Squares will add a contemporary expression and is a good fit for rooms with a more modern design.

Construction is key

A wooden floor is a living, natural material that shrinks or swells depending on temperature and humidity which can cause the wood to crack or become warped. With over 130 years of experience, Tarkett knows how to minimize these unwanted effects which is why our wooden floors are built up in three layers.

By alternating the direction of the fibres in these layers, movements in the wood are minimized, creating a balanced, stable floor whilst our strong glueless locking systems lock the boards tightly against one another without any gaps.

7. Care and maintenance

Give your wood floor some love and attention, and it will age beautifully.

A few things to consider

Wipe up any liquid spills as quickly as possible. Sweep away dust and dirt on a daily basis and avoid using steam, wet mops, furniture polish or abrasive products. At Tarkett we have several smart and effective products to care for your floor and make it last longer. You'll find our accessories at the end of the magazine.

Small repairs

Don't worry if you drop a cup or get a scratch in your floor, Tarkett has several products for you to make spot repairs. Our oil repair kits are colour-matched to our oiled floors and include tools that, together with a little time and effort, will take care of any scratches or blemishes to your hardwax oiled floors. Our repair kit comes with putty in several colours, and repair lacquer to seal with.

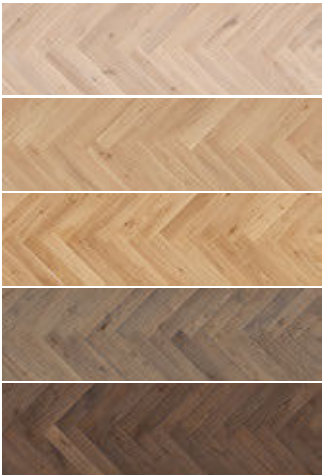

For best result, always follow our installation and care manuals found at tarkett.com

Good luck!

Wood is a living material and small variations in colour and surface is normal. Also sapwood and the presence of knots affects the appearance. Turn to your retailer to see real samples. Our Grading Book at tarkett.com also contains detailed and general information for each wooden floor. All floors are not available in all stores. We reserve the right to change the range.

Accessories

Everything you need to make your newly installed floor even more beautiful, practical and durable.

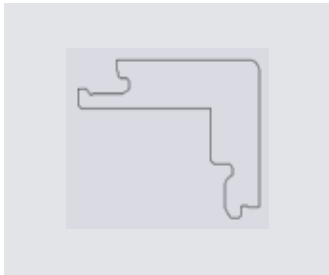

Tarkett stair nosing

Unfinished stair nosing with the same composition as our standard wooden floors.
Hire a professional installer for best results.

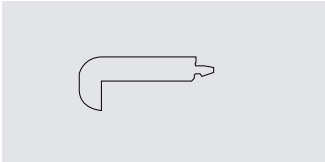

Stair nosing - Integrated 1
To be used with a floating floor installation to allow movements or to cover open steps.
DIMENSIONS (LxWxHxT): 1950x52x72x14
FLOOR THICKNESS: 14 mm, 2-lock
OAK, UNFINISHED: 8795250

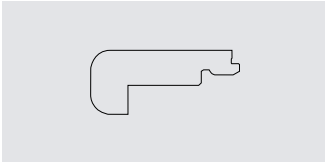

Stair nosing - Integrated 2
Used to make a fully integrated solution for closed steps. To be glued down.
DIMENSIONS (LxWxHxT): 1950x52x44x14
FLOOR THICKNESS: 14 mm, 2-lock
OAK, UNFINISHED: 8795042

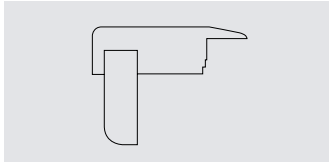

Solid stair nosing

Stair nosing
DIMENSIONS (LxWxH): 2000x48x19 mm
FLOOR THICKNESS: 8,5 mm, Viva
OAK: 8791505

Tarkett's sustainability work

Health & wellbeing

Our authentic wooden floors are designed by nature, we just lend a helping hand by shaping them into beautiful, durable and long-lasting floors for your home. We want our floors to contribute to creating good indoor air quality resulting in healthier people-friendly spaces.

Solvent-free

All of our floor coatings used in our 8,5 mm, 13 mm, 14 mm, 16mm and 22 mm wood floors are solvent-free and have been for a long time.

Easy to clean

Our wood floors are designed to be easily cared for by you with gentle and dry cleaning methods.

Almost formaldehyde-free

Wood and most wood glues emits formaldehyde. All our floors pass the standards for class E1, and we are gradually making the switch to a glue with even lower emissions.

Transparency

All our raw material is continually evaluated by third party specialists. On our website we account for the contents of all our products, the origins of raw materials, emissions and environmental and climate impact through EPD (Environmental Product Declaration) and MHS (Material Health Statement). We have a continuous and close dialogue with the eco-labelling and environmental assessment institutes. Our transparency is for your peace of mind.

Good materials

Tarkett's wood flooring is made from up to **97%** real wood, one of the worlds most renewable raw materials. This means that a vast majority of our wood raw material is recreated by nature, as long as it comes from well-maintained forests which are managed responsibly.

Renewable and climate friendly

Trees contribute to an extended carbon storage effect and when wood raw material is used in long-lasting products it extends the effect even further. The carbon storage effect in the wood raw materials is often far greater than the emissions from forestry, transport and manufacturing of the Tarkett wood floors, making the net emissions negative in this part of the chain – giving wood floors unbeatably low emissions of greenhouse gases.

Long term sustainability

The wood raw material comes from forests located close to our factories in Europe. A vast majority of our wood raw material comes from well-maintained forests in Sweden and Finland where growth exceeds logging. We work with European organisations that promote sustainable forestry and biodiversity and primarily partner with suppliers that are already certified. Our ambition is for all our products to be FSC® (FSC® C008972) or PEFC (PEFC/05-35-125) certified or produced from recycled wood by 2030.

Assessed and approved

All wooden floors from Tarkett meet the requirements for use in Nordic Swan Ecolabelled housing. Our products are also rated in most assessment systems in Sweden, and the majority are certified by Cradle to Cradle®. Our Grace Collection, launched in 2023, is certified in accordance with Nordic Swan Ecolabel and this is the goal for all our collections by 2025.

Climate & circular economy

Tarkett parquet flooring is long-lasting and made to be re-sanded and re-lacquered or re-oiled. This largely contributes to a sustainable use of our natural resources, and is one of the fundamental elements of a circular economy. Products should be cared for and restored as to maintain their technical and aesthetic value for as long as possible.

From waste to energy

All production waste from our wooden floor manufacturing processes is used as a source of energy in our factories. Surplus waste is sold to other industries and used as fuel.

Recycling

Worn-out wood flooring has so far mainly been used for recovering energy. Now, the journey of recycled raw materials from old worn-out floors starts out as new product development alternatives. In two pilot projects we have used worn-out floors as the raw material in new production and we are currently working in extending our recycling on a grander scale. Recycling is the key to unlocking the circular economy, and moving closer to net zero.

Tarkett Human-Conscious Design® is our commitment to stand with present and future generations. To create flooring and sports surfaces that are good for people and for the planet. And to do it every day.

It's a holistic way of doing business, capable of marrying the specific expectations of each of our customers with the profound challenges of protecting our planet. Working together with our partners, we deliver safer and healthier spaces in which people can reach their full potential.

Our three commitments work in synergy to ensure that Tarkett Human-Conscious Design® guides our every decision, from research and design through manufacture and end-of-life.

- Deep Human understanding
- Conscious choices. For people and the planet
- With you. Every step of the way
